### How Does It Work?

Every morning you will receive a phone call from the Senior RollCall program. Just answer as you normally would and the computer will note all is well.

If the line is busy, or on one answers the phone, the computer will try calling again in a few minutes.

If you do not answer after three attempts the computer will issue an *ALERT*.

A volunteer will then contact the people you have previously designated to check on your well being,

In emergencies, police are immediately dispatched to your residence.
